Overview

This report presents a comprehensive overview of time-series data collected from HouseZero® over a 12-month period, from June 2025 to May 2026. The dataset is structured into three primary categories: *Outdoor Sensors, Indoor Sensors,* and *System Sensors*, with data captured from 190 sensors at one-minute intervals.

Illustrated below is the organizational structure of the dataset. Each of the three sensor categories comprise a diverse array of sensor types throughout the building. This structure provides a systematic framework for representing environmental and operational data, supporting detailed analysis across the full monitoring period.
